Our Company

Our Company

About us

Instant Foods México was born as a project of entrepreneurs, and specialists in the food industry with more than 20 years of experience. We are a 100% Mexican company established in 2007 in Monterrey N.L.

Reasons to Exist

The growing demand for practicality and convenience in food. The great need for the search for alternative sources of protein. The situation and current problem of obesity and the lack of adequate nutrients for the base of the population pyramid.

Ideology

At Instant Foods we are clear that our company's reason for existence is customer satisfaction, which is why we offer 5 clear promises of expectations for our products.

What do we do?

Products are designed based on practicality and convenience for users, ready to be consumed or just add water and heat.

- Ready-To-Eat (RTE)
- Foods Easy Food Preparation

Our Markets

- Food service
- Retail
- Social Programs
- E-commerce

High Technology Packaging

How do we do it?

We use the highest technology for sterilization processes (pressure and temperature) that allow us to extend the shelf life of food without the need for preservatives, starting with natural ingredients such as proteins and fresh vegetables.

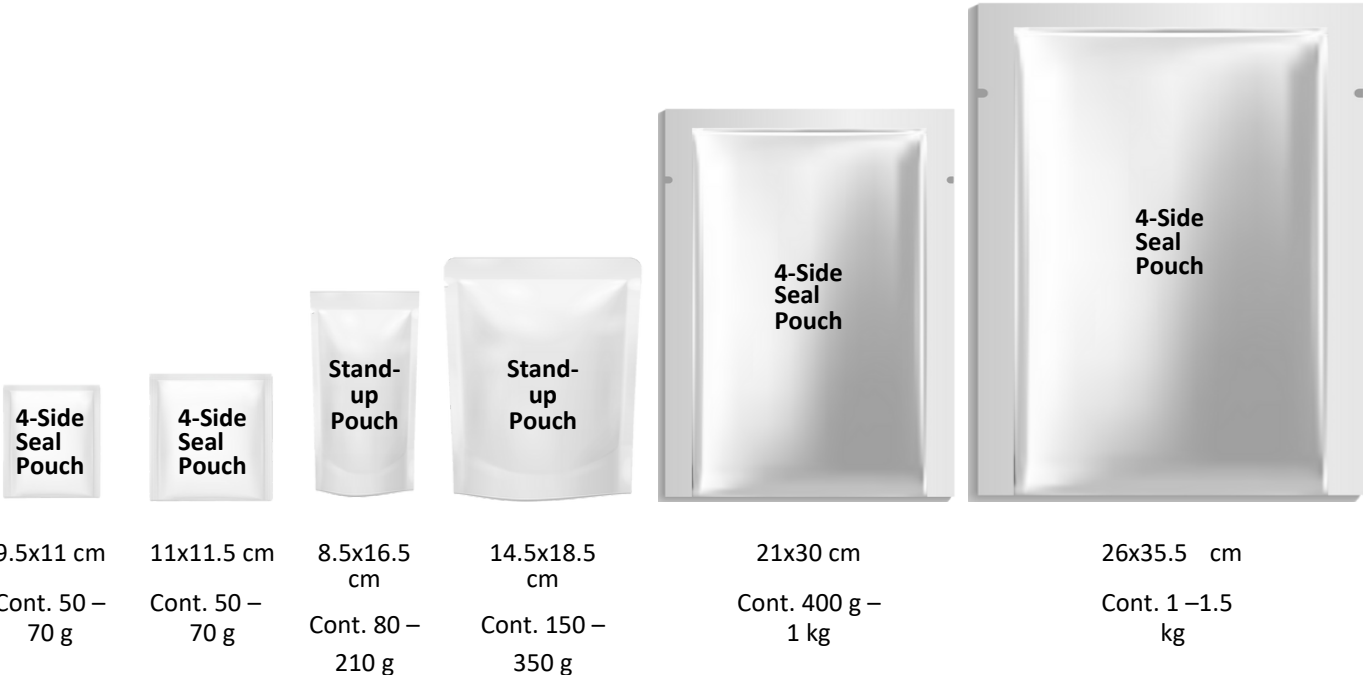

They ensure the freshness of the contents. Heat transfer is faster during the process vs. a tin. Less time is required for exposure to temperature and therefore the food better preserves its original texture and nutrients. This process has migrated to flexible packaging due to savings in packaging, logistics, and product handling costs.
